DETAILED ACTION

Claims 1-26 are pending in the application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 25 and 26, drawn to the process of preparing 2-methyl-4-(4-methyl-1-piperazine)-10H-thieno[2,3-b][1,5]-benzodiazepine compounds of formula I, classified in class 540, subclass 557.
- II. Claims 14-20, drawn to the intermediate compounds of formula II, classified in class 540, subclass 557.
- III. Claim 21, drawn to the intermediate compounds of formula III, classified in class 544, subclass 379.
- IV. Claims 22-24, drawn to the intermediate compounds of formula IV, classified in class 549, subclass 68.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-IV are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product of Group II is deemed to be useful as intermediates for preparing other thieno[2,3-b][1,5]benzodiazepine compounds where Q is piperidinyl, pyrrolidinyl, etc. and the intermediate product of Group IV is deemed to be useful as intermediates for preparing other thienyl

Art Unit: 1624

compounds where the ester group is reacted piperidine, pyrrolidine, etc. and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II-IV, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
